Frequently Asked Questions for COL106 – Assignment 1

1. Can we use LinkedList library of java to implement linked lists? Can we use sets?
   Ans: As mentioned in the assignment, you need to implement the link list yourself in Java. You can copy the code if needed, but do not use any library function. No other data structure is allowed. Please stick to the instructions given in the statement as we have designed the assignment keeping in mind certain criteria.

2. What if for a particular instruction, the exchange/mobile phone does not exist?
   Ans: You can throw an exception for the same as mentioned.

3. Should we delete a phone from the root/exchange if it is switched off?
   Ans: Please read the assignment statement and understand it carefully.

4. How many files can we submit? How many times can we test our code before final submission?
   Ans: You can submit up to 15 files, and you can test it any number of times before final submission.

5. Can we implement some methods other than the ones mentioned in the assignment?
   Ans: If needed, yes. However, they should not violate any of the instructions provided in the statement.
